Forecast for Sunday 03 Nov 2024

Weather: Overcast to start with outbreaks of drizzle. Extensive low cloud trapped beneath an inversion, limiting cloud tops to around 1000m. Higher summits, particularly in the vicinity of, and including, Yr Wyddfa are likely to be above the cloud layer at times throughout the day. Some brighter spells expected as cloud breaks develop later in the west and northwest of the park. Mostly dry during daylight hours away from the east, perhaps further drizzle late evening.

Chance of cloud-free hill tops above 800m: 20%, but 60% for western hills and summits above 1000m.

Low Cloud and visibility: Extensive low cloud beneath around 1000m, with bases of 400-600m. Bases likely lifting for a time during the afternoon, with mid-level routes becoming cloud free for a time. Visibility moderate to poor in drizzle, otherwise good or very good outside of cloud.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Good navigation skills are recommended given long periods of poor visibility. Improving walking conditions expected during the afternoon around Yr Wyddfa.

Forecast for Monday 04 Nov 2024

Weather: Rather cloudy to start following the clearance of any overnight valley fog or early light drizzle. Variable cloud amounts across the west of the park where bright and sunny spells are likely. Remaining cloudier across eastern slopes where some patchy light drizzle is possible.

Maximum wind: East to southeast 10-15mph, gusts to 20mph.

Chance of cloud-free hill tops above 800m: 40% in the east, 70% in the west.

Low Cloud and visibility: Cloud bases 500-700m to start, but down to lower slopes around 300m in the east. Variable cloud amounts in the west with bases close to, or above 800m later. Visibility generally good outside of cloud, moderate to poor in any drizzle.

Temperature: **Valleys:** Plus 8 rising to Plus 14 Celsius
At 800m: Plus 4 to 8 Celsius, warmer at top of inversion layer.
Freezing level: Above summits.
